Rampart AI™

RECOGNIZING THE CYBER THREAT LANDSCAPE'S IMPACT ON BUSINESS OPERATIONS

|	
Assessing Known Cyber Risks	Gain a comprehensive understanding of the known cyber risks lurking within your operational environment. This includes identifying vulnerabilities in your codebase, including third-party code dependencies. Rampart™ becomes an integral part of your agile transformation, actively monitoring your operations.
Risk Reduction	Rampart™ significantly reduces your exposure to cyber threats without necessitating changes to your existing codebase. This approach offers instant wins while your transformation journey progresses, safeguarding your operations from potential disruptions.
Risk Elimination	Rampart™ prioritizes the elimination of cyber risks as an outcome of your agile transformation. Rampart™ closely monitors your applications in the cloud to ensure they operate as expected. This continuous monitoring is the result of your transformation efforts, ensuring a secure and resilient operational environment.

With Rampart™ at work, your organization can not only acknowledge the cyber threats but also proactively address them, ensuring the uninterrupted flow of business operations.
